

## HAVE YOU BEEN INFORMED?

“The marina operator should provide each pleasure-boat operator intending to connect a boat to the marina low-voltage electrical supply with a copy of an instruction notice containing the following **wording, as a minimum:**

‘The marina provides power for use on your recreational boats with a connection to the marina low-voltage electrical supply which is connected to a copper-based marina electrical protective earthing system.

An isolating transformer... may reduce corrosion activity may reduce corrosion activity caused by the coupling of your recreational boat’s earth to the marina electrical protective earthing system and/or other recreational boats... **galvanic isolators complying with AS/NZS 3004.2** Clause 4.6.4 may be used to reduce these effects’’. \*
