Date: 8<sup>th</sup> May, 2012

## 3PL Gives West Coast Confidence

Australia has often been described as one of the hardest markets anywhere in the world to effectively and efficiently service both sides of our great continent. Help is at hand though with WA based company Marine Protection Systems (MPS) recently establishing third party logistics, distribution and serviced offices aimed at east coast marine business's struggling with efficient delivery of their products to the west.

MPS have two purpose built premises, one in WA's bustling marine hub of Fremantle and the other in the popular Welshpool industrial precinct which is close to both road and air transport services.

Their facilities and services include:

- ✓ Mixed and full pallet warehousing
- ✓ Order consolidation, picking and packing
- ✓ Metro and regional road and air freight services
- ✓ Secure complex, with 24hour monitored security
- ✓ Shared offices and office services for both short and long term lease

"We had surplus space and capability and we had often discussed the difficulties of doing a great job as a supplier to both sides of the country with our own products. From there it was just a natural progression with the opportunity to see if we could help others with the same challenges" said General Manager, Jeff Bullock.

3PL or 3<sup>rd</sup> Party Logistics and distribution services is one of the fastest growing business sectors in the world as global economies force business's to look to store and transport products more efficiently, cutting the time to market but also the handling and costs to get to your ultimate customer.
